
Blame Vista?

This thread discusses the Content article: [Blame Vista?](#)

While we wait to finish working through a few mainboard and graphics card reviews here (8800GTS lovin' is on the way) we decided to segue into some moderately dangerous territory here, and have an open (and perhaps opinionated to a degree) look at an article that's made a lot of waves on the net recently. Is "A Cost Analysis of Windows Vista Content Protection" by Peter Gutmann, Ph.D. really an analysis of Vista? We're not so sure...
